---

Eric and Warren,

Mike Ortiz has requested additional information and review of the data. The documentation requested includes Eberline's SOP for calculating results. This information was provided upon request (and is attached above for your reference). Understandably, NMED is performing a very thorough review of the data to make sure it is consistent with existing data. Based on the level of review, we indicated to Mike that the level 4 data packages could be made available to him, if requested.

In addition to the documentation, NMED has requested that EPA/START blank correct the sample results. I spoke with the CHP, Rick Haaker, and this is certainly something we can do, but wanted to get your approval before we proceed. If we proceed with blank correcting the results, all data that was published early this morning would get updated after this additional review.

Please advise. Thanks!

Kristie
